

I have a concern about allowing cell phones to be used in -flight. I am a furloughed flight attendant for USAIRWAYS and will return this year. I had been told by an officer of the US Air force years ago that the wires and cables were not covered properly on commercial aircraft. He continued by saying that is why certain electronics are not allowed in-flight. We need to see some data on this. Do not impose unsafe electronics to be used in-flight without such data to secure the plane, the crews and passengers safety.

Thanks for taking the time to read my commit and concern on the cell phone use in-flight.

Sincerely,

Beverly A. Stotts-Dorsey
